Toronto, ON • 437-463-2552 • fahir.sarvar@gmail.com

JUNIOR SOFTWARE DEVELOPER

DETAIL-ORIENTED | COLLABORATIVE | ADAPTABLE

- A motivated and team-oriented student of Software Engineering Technology, with applied project experience with object-oriented programming, relational database design and querying, full-stack responsive web development, and Linux server configuration
- Strong cross-functional teamwork skills, with effective communication under pressure, and proven problem-solving abilities honed through work experience and academic projects
- Combines theoretical knowledge with practical work experience to thrive both independently and in collaborative, fast-paced and deadline-driven environments
- Demonstrated ability to successfully balance demanding full-time studies with a high GPA and part-time employment

TECHNICAL SKILLS

Programming: Java, SQL, C#, JavaScript, HTML/CSS, Python

Frameworks & Libraries: React, Express, .Net, Angular, Node.js

Systems: Unix, Linux, Windows

Development Tools: Git, Visual Studio Code, Eclipse, Visual Studio, MySQL

EDUCATION

Software Engineering Technology (Co-op) Advanced Diploma

Sept. 2025 - Present

Centennial College, Toronto, ON

GPA: 4/4.5 (A)

Courses: Database Concepts (Oracle SQL) | Web Development (HTML/CSS/JavaScript) | Linux/Unix | Web Interface Design | Software Requirements Engineering | Object-Oriented Programming (C#/Java) | Software Design Principles

ACADEMIC PROJECTS

Enterprise E-Commerce Database Design (Oracle SQL)

- Designed a multi-phase relational database for an enterprise e-commerce system, from requirements scoping through implementation
- Built an entity-relationship diagram and normalized logical schema using Oracle-specific data types, ensuring data integrity across all tables
- Wrote and tested 10 business queries against the schema, applying joins, group functions, and subqueries to support real-world reporting needs

Multi-Server Linux Infrastructure Setup (Team Project)

- Configured a 3-VM Linux environment featuring a Nginx load balancer distributing traffic across 2 backend web servers
- Set up and secured SSH remote access, Samba file sharing, firewall rules, MySQL, and FileZilla across all machines
- Collaborated with two teammates to divide configuration tasks, troubleshoot connectivity issues, and validate the environment end-to-end

Multi-Page Responsive Website - *Shake Shack in Canada*

- Built a 5-page responsive website from scratch using semantic HTML5 and custom CSS, including a homepage, location pages, sitemap, and contact form
- Implemented responsive design with CSS Grid and media queries, restructuring layout across three breakpoints (mobile, tablet, desktop)
- Developed a functional contact form using multiple HTML input types (text, tel, email, radio, select, textarea) with client-side validation patterns

WORK EXPERIENCE

Team Member (Line Cook / Customer Service) | Shake Shack, Toronto, ON

Nov. 2024 - Present

- Provide quality customer service in a high-volume, and fast-paced environment, processing orders and resolving customer issues quickly and clearly under time pressure, strengthening communication and problem-solving skills
- Prepare orders accurately, efficiently and in accordance to food safety, building multitasking and attention-to-detail skills
- Communicate clearly with teammates to coordinate order flow during busy periods
